Proteq Series

The Proteq Series home safe has been specially designed to protect limited amounts of cash and valuables within a domestic and small office environment. The Proteq Series is currently the only safe of its size thoughtfully designed to accommodate lever-arch files, expansion folders, laptops and small valuables.

The Proteq Series' body and door are filled using a special Chubb Safes' patented barrier material, offering fire resistance up to 1 hour and burglary protection. It is currently the only safe of its type in Australia featuring both these protective qualities with an independent test report provided upon request.

The Proteq Series offers the flexibility of 4 locking configurations. For further information please contact Gunnebo Security or any of our Authorised Dealers.
