BODY -

The press formed body linings are arc welded to form a 110mm thick body within which is poured a high strength (110mpa) refractory material with steel fibre reinforcement.

DOOR -

Thickness 190mm incorporating a 100mm thick barrier of high strength (110mpa) refractory material with steel fibre reinforcement. A millhard barrier provides additional drill and torch protection over the entire area of the door.

BOLTWORK -

A four-way boltwork system secures the door to the body with 38mm diameter bolts. All boltwork is positively guided through the door to engage the body at multiple points.

LOCKING -

Standard locking is a three wheel combination lock and a digital electronic lock.

SECONDARY LOCKING SYSTEM -

The safe is fitted with a glass activated relocking system that will secure the boltwork independently of the principal locking system if triggered by an attack.

ANCHORING -

Safe can be bolted to the floor via the 2 bolt down holes in the base of the safe.

INTERNAL FITTINGS -

Adjustable shelves are supplied with each safe. Cupboards and drawers are available.

FINISH -

Stainless steel fascia and satin chrome lock furniture compliment the Marble Grey texture finish on the body and door.
